

Card from Jeffrey Cheng

Admitted to Princeton University, Class of 2025
Majoring in Computer Science

— August 6, 2021

12th Grade

5th Grade

JEFFREY CHENG

Jeffrey joined Storming Robots in 5th grade and remained through 12th grade. During his time at SR, he served as an instructor, a core developer in the SR Development Group, and was one of the key contributors to the 2021 RoboCup (precollege) New Rescue Simulation Competition.

I just wanted to thank you guys and Storming Robots. I have been so lucky to be able to attend your robotics classes for 8 or so years. They have given me countless opportunities that I otherwise never would have dreamt of, like visiting other countries to compete or teaching my own classes. Storming Robots has made a huge impact on the way I learn, work with others, think, teach, and do just about anything in life.

There's no way I could envision my life from 5th grade to now without Storming Robots because it's always given me something to look forward to during the week.

I hope you truly understand the impact your center has on the students that come through it. So many things I take pride in stem from my experiences at Storming Robots. I have also made countless unforgettable memories, like all the pizza parties and midnight work sessions.

So once again, I'd like to thank you (Mrs. Elizabeth), Dennis, and everyone at Storming Robots for everything you guys have done for me.

I wish you the best and I'll try to visit . :-)

Sincerely,
Jeffrey Cheng
